Daniel Semerjyan

Enterprise AI & Cloud Adoption // Ex-Founder // Builds in Production

Trusted advisor to enterprises on AI adoption and cloud, and an **ex-founder** who still ships. I help organizations **adopt an AI strategy and benefit from AI transformation**, moving from pilots to production: agentic systems, RAG, and GenAI apps in real users' hands on AWS and Azure. At PwC I lead delivery, run technical discovery, and grow accounts with directors and managers. I build with AI every day (Claude Code, Cursor) and pressure-test the business case, not just the code.

// professional_experience

AI & Cloud Senior Consultant @ PwC Poland

2022 – current

- Lead the engineering team and run **value-discovery workshops** with enterprise stakeholders, mapping business problems to AI and cloud use cases.
- Shape the **proposals and account growth** that follow, finding and upselling new work with directors and managers.
- Authored an **agentic AI SDLC framework** adopted into an insurance client's AI strategy; roll out and teach **Claude Code** to developers in a regulated environment.
- Build and ship **production GenAI apps**, e.g. a marketing-compliance app for a Big Pharma client, processing 10–60 page PDFs against a golden knowledge base, live to hundreds of internal users.
- Built a GenAI developer platform on **Google Cloud Vertex AI** for a bank; led cloud architecture and automation across banking clients.

Founder & Independent Consultant @ semerjyan.dev

2024 – current

Build and ship AI products, and advise organizations on AI adoption and transformation.

AWS Instructor @ infoShare Academy

2024 – 2025

Paid instructor teaching AWS fundamentals to aspiring developers.

Software Engineer @ Accenture Poland

2021 – 2022

Built serverless Python APIs on AWS for telecom and automotive enterprises; CI/CD with Terraform, Ansible and Jenkins.

Software Engineer @ flow2code

2020 – 2021

Full-stack feature development (FastAPI + React) in a Scrum team; daily client calls, testing and code review.

Automation Engineer @ Meform

2018 – 2020

Automated industrial IoT processes and measurements with Python and C++.
